

Easy to Use, Easy to Maintain

Single-button solutions consolidate all the necessary setup steps. Do you want to “watch TV” or “play music”? The fun is just a simple click away!

Our cinema systems are as easy to care for as they are to operate. The speakers and electronics will provide years of maintenance-free operation. Only the projector

requires occasional attention: the manufacturer recommends routine filter cleaning and eventual lamp replacement – less than five minutes to perform and as simple as changing a light bulb!

In addition to being properly insured, Community Cinema Systems performs all installations with a commercially licensed electrician on site.

What's Playing?

With the commercial networks ABC, CBS, NBC and WB offering more than 50 hours of HDTV programming every week, plus HDTV-exclusive networks such as ESPNHD, DiscoveryHD and HDNET sprouting up, your residents can enjoy a multitude of viewing choices.

For your convenience, with each installation we include a one-year subscription to a daily HDTV e-mail program guide from www.ilovehdtv.com.

SANYO

Discover a better way to attract new residents and to keep your community entertained and involved.

By enhancing your center's multi-purpose living space with a high-definition cinema system, you will set your community apart, making television, movies, music and other media far more accessible, enjoyable and exciting.

Imagine the possibilities ...

vintage movie nights, popular sporting events, or simply watching prime-time sitcoms or dramas in high definition at life-size proportions!

Community Cinema Systems specializes in bringing the true theater experience to shared living spaces through high-definition video, crystal-clear surround sound, and larger-than-life screens that allow everyone to enjoy the best seat in the house.

With a talent for maximizing affordability, flexibility and ease of use, **Community Cinema Systems** is sure to design a system that's right for you.

Versatile

Our systems are true multimedia solutions. In addition to handling entertainment sources like VHS, cable television, DVD and HDTV, your theater system flawlessly projects PowerPoint slides, spreadsheets and other computer applications where the display of precision graphics and data is necessary. Presentations are a snap!

Simple and Secure

Because we use in-wall speakers, theft-deterrent projector mounts, and remote storage of all components, you can rest easy that your system is safe from tampering and your room remains free from obstructions.

Customized Solutions

At **Community Cinema Systems**, we understand technology and we know how to listen. Since every facility has a different population and its own unique requirements, we will design your theater to fit your size, your needs, your preferences. Perhaps you have residents with hearing impairments – wireless headphones are available. Let's explore the options!

What is HDTV?

Simply stated, HDTV (high-definition television) means better pictures and better sound – yet it is much more than that. It is the most significant technological improvement in television since the introduction of color in 1954. When Chuck Yeager broke the sound barrier, he did more than merely go faster.

Similarly, HDTV crosses a threshold into a new dimension of realism. Images are startlingly vivid with multi-channel surround sound that puts you in the center of the action. The industry has invested billions of dollars in a new precision, all-digital infrastructure. Long awaited, HDTV is finally a reality.

Field Trip!

If you are ready for a night at Turner Stadium, be in the lobby at 7:30. Since our HDTV demonstration gear takes less than 10 minutes to set up, taking everyone on a "virtual trip" to see the Braves couldn't be easier. Treat your residents to a free, fun evening while you consider the possibilities. Call today, and **Community Cinema Systems** will bring the show to you!
